

[A]

Three alternative updates from the same portfolio at t

Current portfolio

Observed support.

t

Direct allocation

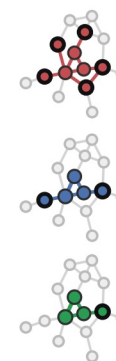

Single support

Retain-and-adopt

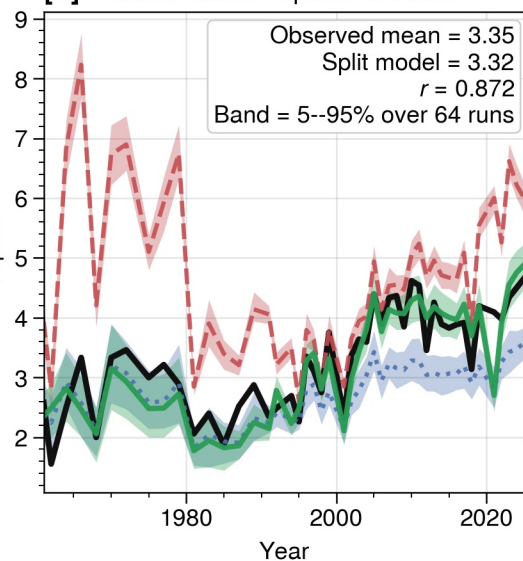

$t + 1$

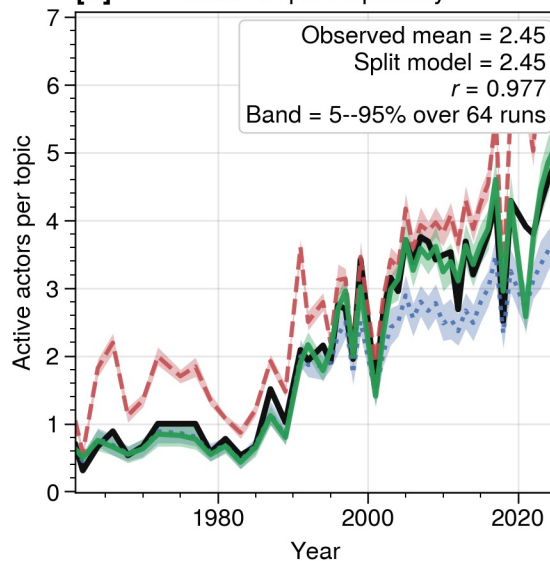

Observed actors, budgets K_{at} , and the pooled concern space Φ are fixed.

The three rules differ only in how they update support from t to $t+1$.

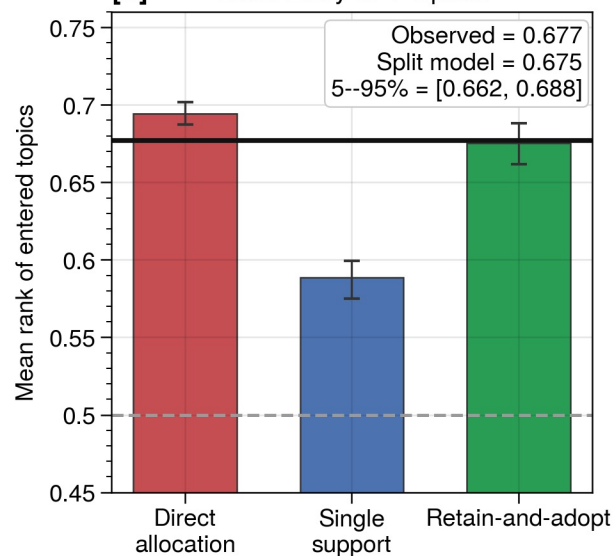

[B] Mean Active Topics Per Actor

[C] Mean Topic Popularity

[D] Local Entry In Φ -Space

— Observed - - - Direct allocation . . . Single support — Retain-and-adopt
