

Treaty articles as local components in the Antarctic concern space

Small multiples reduce cross-space noise by splitting each article into only its locally connected support clusters.

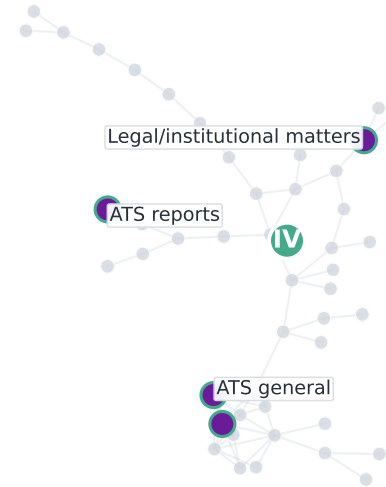

Art. II Scientific freedom
local components: 1, 1, 1, 1

Art. III Information exchange
local components: 2, 1, 1, 1

Art. IV Sovereignty freeze
local components: 2, 1, 1

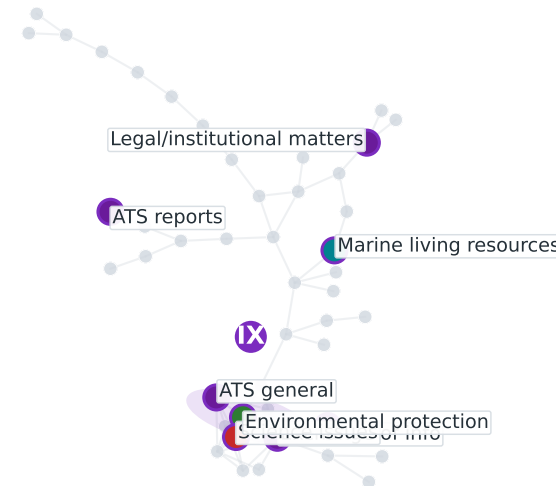

Art. V Nuclear/waste ban
local components: 1, 1, 1, 1

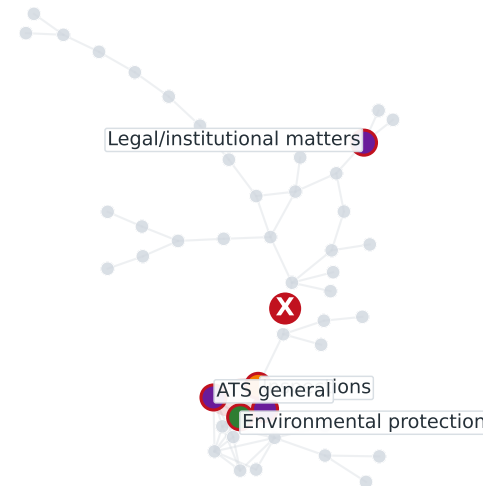

Art. VII Inspection and notice
local components: 3, 1, 1

Art. IX Consultative governance
local components: 5, 1, 1, 1

Art. X Protective efforts
local components: 4, 1

How to read this

Each panel uses the same saved concern-space layout. Colored blobs are only drawn for support topics that remain locally connected under a tight displayed-graph cutoff (shortest-path cost ≤ 1.05).

Interpretation

Compact blobs indicate local constitutional anchors. Singletons indicate cross-cutting article touchpoints that do not form one empirical neighborhood in the filtered concern-space visualization.
